

PRESS RELEASE

Congratulations to our Year 11 students on achieving a fantastic set of qualifications this year. During a year of challenges and uncertainty, we are so proud of the resilience, fortitude and perseverance shown by this special year group.

As a result of their achievements, our students will be moving on to a wide range of post-16 courses across a number of local school sixth forms, colleges and some on to apprenticeships. We are delighted that here is not one student without an offer of a place somewhere.

Although our students did not sit public examinations this summer, the grades that they have received are an accurate reflection of what they deserved. The grades awarded are the outcome of a detailed and rigorous process which has taken into account a number of different forms of assessment, moderation and quality control. Whilst specific results will not be published, across a number of measures the grades awarded exceed historic national figures and are testament to the overall high quality of education on offer at the school.

Mr Johnson, Headteacher commented:

These fantastic results are the justified reward for our student's hard work and perseverance over five years of education and, in particular, their spirit of resilience over the last two years of disrupted learning. Students have been determined not to allow the pandemic to knock them off course and we are so proud of their attitude and sheer hard work which has led to such great results

This year, our expert teachers followed a rigorous, evidence-based assessment process, following the guidance of the exams regulator, to ensure that students received the results that they deserved. I would like to thank teachers and leaders for their professionalism, integrity, and extraordinary hard work during this process. These grades are accurate and are a cause for huge celebration!

On behalf of the school, the staff team, the local governors and the Maiden Erlegh Trust, I extend my congratulations and best wishes to this successful group of young people. Go and take on the world!
