

12 November 2020

Dear Parent/Guardian

Setting in Year 10

I am writing to remind you about the selection of students for sets next term and the option of separate sciences (triple science).

On the week starting Monday 23 November, students will sit assessments in Biology, Chemistry and Physics. To support the students there is a wide array of revision materials on Google Classroom as well as Kerboodle. Please encourage your child to work hard and achieve their best in this process.

24 students from each side of the year will be invited to study separate sciences. The selection process will be based on internal assessment as well as teacher knowledge of the student. The changes in teaching groups will be implemented at the start of the spring term.

Thank you for your continuing support

Yours sincerely

Mr R James
