

23 June 2021

Dear Parent/Guardian

**Year 7 zoology day**

The Science department are delighted to present a zoology day on Thursday 8 July. Students will receive a 1-hour presentation by Quirks animal road shows looking at several reptile and insect species.

During the hour, live animals will be in the room, therefore we expect a high standard of behaviour. Students must follow the instructions given by members of staff or members of the presentation team. Failure to do so will result in their removal.

In the week leading up to this day, the science department will encourage project work based on some of the species they are likely to see

A voluntary contrition of £2 is payable via Parent Pay [www.parentpay.com](http://www.parentpay.com) to support the school in this endeavour.

Yours sincerely

**Ms E Tyler**  
Science teacher
